

Statement on Conflict Minerals

In 2010, the United States passed the Frank-Dodd Act, which among other reforms, requires companies to verify and disclose their use of so-called "Conflict Minerals." Conflict Minerals has been defined as materials mined in conditions of armed conflict and human rights abuses, most notably areas within Congo and Rwanda. These 4 materials are Tantalum, Tin, Tungsten, and Gold.

Impact Components will exercise due diligence, and will take all reasonable steps to confirm suppliers' statements regarding the absence of restricted materials and will maintain full traceability of relevant documentation as made available to us, and as required by law.

In general, unless we are involved in the Manufacturing of the product we supply to you, relevant documentation, as required by law, should be procured directly from that Manufacturer. Impact Components makes no guarantees of compliance for other Manufacturers. EICC Statements will only be supplied for product we manufacture.
